

People have had their identities stolen. Many are coming through as deceased. The Financial Aid department has been very diligent about this and is trying to identify fraudulent applications and reach out to the pseudo applicants. More than 1200 applications were submitted during the same timestamp and from different IP addresses. Work will continue with the Chancellor's office etc. A similar event happened around this same time last year. However, this included 200 applications rather than 1200. This is a Community College system-wide problem. Roger is hoping that they can filter the applications out at the chancellor's office first and it would be taken care of. Emails and domains from both Russia and Germany as well as the US. The campus will remain vigilant.
