Enable Screen Share Permission for macOS Catalina (10.15) and later

When you first join a Napa Valley College online counseling meeting on macOS Catalina, you'll be asked to enable the Screen Recording permission for Google Chrome.

1. When you see the following dialog, click "Open System Preferences".

Don't see "Open system Preferences"

2. In the Screen Record section <u>click the box next to Google Chrome to allow screen sharing</u> for your Online Counseling (via Cranium Café) video meetings/appointments. You may need to click the unlock icon at the bottom-left.
